Printing Specifications

- Printing:** Web Offset; 4-color process (CMYK).
- Line Screen:** 175-line.
- Trim size:** 8.375" wide x 10.875" high. Keep all live matter .375" from outside trim and gutter.
- Bleed:** Only permitted on full page, spread, and tab pages. Must extend .125" beyond trim size on all sides and include printer's trim marks.
- Spreads:** Account for gutter (inside margin) when running type and art across left- and right-hand pages.
- Please Note:** Advertiser assumes all responsibility for files that do not output correctly due to errors or omissions during construction. Design assistance is subject to hourly charge.

Ad Preparation

PERFORMANCE RACING INDUSTRY requires that all ad files be submitted as single-page, high-resolution PDF, or PDFx1a files. For multiple ads, send each ad in a separate PDF file.

- Document Set Up:** Do not build ad on default paper size of 8.5 X 11. Set the document page size to match PRI's ad trim size exactly.
- Exported PDF:** Use PDFx1a settings when exporting from page layout program.
- Distilled PDF:** Create postscript file from a page layout program. Use PRI's ad trim size for document paper size, then distill through ADOBE ACROBAT DISTILLER using PDFx1a settings (or you may download PRI's Distiller Job-options at www.performanceracing.com).

PDF Production Requirements

- Color:** Must be sent in CMYK format. **No RGB files** accepted. Color accuracy is the responsibility of the advertiser and will be held to SWOP standards.

B&W art must be sent in Grayscale or Bitmap format.

Do not use ICC or color profiles.

- Images:** Minimum resolution of 300 ppi (color or grayscale files) and 1200 dpi (bitmap or line art files). Images and logos from websites are not usable for print, as they are low resolution (72 ppi). **Never resample up** images, rather scan at high resolution to start. Files must be uncompressed.

- Fonts:** Embed all fonts in PDF file.
- PROOFS:** Because color views differently from one computer monitor to another, it is highly recommended that a CMYK/SWOP certified color proof accompany the ad file. PRI will assume supplied materials are in compliance with current SWOP specifications.

PRI does not accept responsibility for reproduction or color matching without a SWOP-certified color proof. Printer will match color on press as closely to provided proof as Web Offset printing allows.
